# Study information

## Scientific Title

Impact of integrated care pathway (ICP) on management of hospital in-patients with diabetes

## Study objectives

To develop a care pathway for in-patients with diabetes, and assess the impact of the pathway on the management of diabetes in hospital.

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration

## Study design

Randomised controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Hospital

## Study type(s)

Treatment

## Participant information sheet

## Health condition(s) or problem(s) studied

Nutritional, Metabolic, Endocrine: Diabetes

## Interventions

Patients with diabetes admitted to the medical unit will be randomised to either a ward using ICP or a control ward.

All nursing staff on the medical unit will be included in the study, as will all patients with diabetes randomised to either a control or intervention ward, over a period of one year.

## Intervention Type

Other

## Phase

Not Specified

## Primary outcome measure

1. Nurses' knowledge
2. Patient satisfaction
3. Standard of care compared to the Trust's Diabetes guidelines

**Secondary outcome measures**

Not provided at time of registration

**Overall study start date**

01/07/1999

**Completion date**

01/11/2003

## Eligibility

**Key inclusion criteria**

Not provided at time of registration

**Participant type(s)**

Patient

**Age group**

Not Specified

**Sex**

Not Specified

**Target number of participants**

Not provided at time of registration

**Key exclusion criteria**

Not provided at time of registration

**Date of first enrolment**

01/07/1999

**Date of final enrolment**

01/11/2003
