Study information

Scientific Title

A pilot study to determine the feasibility of a glaucoma direct referral scheme for community optometrists and to evaluate the clinical quality of optometry follow up of glaucoma patients in the community and hospital

Study objectives

To test the feasibility of a direct referral scheme for community optometrists and to evaluate the follow up of glaucoma patients in community and hospital

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Other

Health condition(s) or problem(s) studied

Eye Diseases: Glaucoma

Interventions

Randomised trial

1. Optometrist shared care
2. Hospital clinic

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Reduction in inappropriate hospital referrals

Key secondary outcome(s)

Not provided at time of registration

Completion date

10/07/2005

Eligibility

Key inclusion criteria

100-150 new glaucoma referrals age 60-85 approx and 400 follow up patients per year for two years

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

10/07/2003

Date of final enrolment

10/07/2005
