Treatment

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Stroke patients presenting with dysphagia

Interventions

Thickened fluids vs swallowing / postural modifications

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Added May 2008:

1. Number and frequency of chest infections
2. Episodes of dehydration

Secondary outcome measures

Added May 2008:

Patient and carer compliance with interventions

Overall study start date

01/12/2005

Completion date

01/03/2009

Eligibility

Key inclusion criteria

Patients admitted to Sheffield Teaching Hospitals with a diagnosis of stroke who are referred to Speech & Language Therapy Dept with a diagnosis of dysphagia.

Participant type(s)

Patient

Age group

Adult

Sex

Not Specified

Target number of participants

50

Key exclusion criteria

Added May 2008:

Adults presenting with moderate or severe dysphasia

Date of first enrolment

01/12/2005

Date of final enrolment

01/03/2009
