# Study information

Scientific Title

#### **Study objectives**

Not provided at time of registration

#### Ethics approval required

Old ethics approval format

#### Ethics approval(s)

Not provided at time of registration

#### Study design

Randomised controlled trial

#### Primary study design

Interventional

#### Study type(s)

Treatment

#### Health condition(s) or problem(s) studied

Prevention of primary liver cancer with selenium supplementation - targeted to high risk population

#### **Interventions**

Eligible patients who consent to participate will be randomly allocated to the selenium group (oral selenium supplementation: 200mg selenium per day, in the form of selenized yeast tablet) or control group (receiving placebo).

#### **Intervention Type**

Drug

#### Phase

**Not Specified** 

#### Drug/device/biological/vaccine name(s)

Selenium

#### Primary outcome(s)

Not provided at time of registration

#### Key secondary outcome(s))

Not provided at time of registration

#### Completion date

01/01/2002

# Reason abandoned (if study stopped)

Lack of funding

# **Eligibility**

#### Key inclusion criteria

Participants will include:

- 1. Men aged 45 to 64 with positive HBsAg (hepatitis B surface antigen) test
- 2. Negative AFP (alphafetoprotein) test
- 3. Normal ALT (alanine aminotransferase) values

#### Participant type(s)

Patient

#### Healthy volunteers allowed

No

#### Age group

Adult

#### Sex

Male

#### Key exclusion criteria

Not provided at time of registration

#### Date of first enrolment

01/01/2000

#### Date of final enrolment

01/01/2002

# Locations

#### Countries of recruitment

United Kingdom

England

# Study participating centre Department of Public Health & Epidemiology
