Randomised controlled trial

Study setting(s)

GP practice

Study type(s)

Screening

Participant information sheet

Health condition(s) or problem(s) studied

Age-related depression

Interventions

1. Mental health check by community mental health team member
2. Standard care

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Change in Geriatric Depression Scale (GDS-15) score

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/01/1996

Completion date

30/04/1999

Eligibility

Key inclusion criteria

1. Patients registered with Latham House Medical Practice aged 75+
2. Identified as depressed at their annual health check.

Participant type(s)

Patient

Age group

Senior

Sex

Both

Target number of participants

93 (added 27/01/10; see publication)

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/01/1996

Date of final enrolment

30/04/1999
