Study information

Scientific Title
Does oral diclofenac together with oral paracetamol affect gastric volumes and pH in children?

Study objectives

Does diclofenac/paracetamol given orally pre-operatively together increase gastric contents when compared to paracetamol?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised double-blind controlled trial

Primary study design

Interventional

Study type(s)

Prevention

Health condition(s) or problem(s) studied

Surgery: Pre-operative care

Interventions

Diclofenac and paracetamol compared to paracetamol alone

Intervention Type

Drug

Phase

Not Applicable

Drug/device/biological/vaccine name(s)

Diclofenac, paracetamol

Primary outcome(s)

Volume and pH of gastric contents at induction

Key secondary outcome(s)

Not provided at time of registration

Completion date

20/02/2007

Eligibility**Key inclusion criteria**

1. 50 children recruited from Royal London Hospital paediatric wards, aged 2-15 years
2. Elective surgery
3. American Society of Anesthesiologists (ASA) I/II

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Lower age limit

2 years

Upper age limit

15 years

Sex

All

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

20/04/2003

Date of final enrolment

20/02/2007

Locations**Countries of recruitment**

United Kingdom

England

Study participating centre
