Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Publication

Key secondary outcome(s)

Not provided at time of registration

Completion date

10/01/2005

Eligibility**Key inclusion criteria**

1. Patients entering the study will have volunteered for the study and will have agreed to be randomly allocated to either a control group or one of two treatment groups.
2. A diagnosis of idiopathic PD

3. Categorised between stages 1 to 4 on the 'Functional Rating Scale for Parkinson's Disease', Hoehn & Yahr (1967)
4. Neuropharmacologically stable before and during treatment
5. Fluent English speakers
6. Intelligibility of speech will have received a rating of between 5 and 9 on the Parkinson's disease disability rating scale. (Yorkston 1995)

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

1. Any history of a language deficit caused by a past event such as a cardiovascular event
2. Evidence of a cognitive deficit on the 'Mini-Mental State Examination (score >24), Folstein et al 1975
3. Evidence of depression on the Beck Depression inventory (score <14), Beck & Beck 1972.
4. History of a chronic hearing loss or report/suspected hearing loss
5. History of laryngeal disease and will be free of acute cardiac and respiratory conditions during the study

Date of first enrolment

08/08/2003

Date of final enrolment

10/01/2005

Locations**Countries of recruitment**

United Kingdom

England
