Study information

Scientific Title

The effect of complementary therapies on improvement of diabetic control through lifestyle modification and reduction of stress response

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Diabetes mellitus

Interventions

Structured exercises of yoga and relaxation in randomly assigned subjects

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Not provided at time of registration

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/04/2000

Completion date

31/05/2001

Eligibility

Key inclusion criteria

1. Aged 30 years and over
2. Type II diabetes mellitus
3. Features of metabolic syndrome treated with either diet or hypoglycaemic agents

Participant type(s)

Patient

Age group

Adult

Sex

Not Specified

Target number of participants
