Plain English summary of protocol

Background and study aims

This study explored ways of preventing eating disorders and tackling body dissatisfaction in young people. Although several school programmes of this sort already exist in the UK, none has been rigorously evaluated to determine whether it is actually helpful for young people. The aim of this study is to see whether students who receive a school intervention called Me, You & Us showed improvements in body esteem, eating habits, the extent to which they buy in to a media ideal of thinness, interactions with friends, mood and self-esteem, compared to their peers in a control group. The study also looks at how much students like these lessons and whether school staff are able to deliver the lessons from a manual they are given.

Who can participate?

All students in years 8 and 9 of participating schools

What does the study involve?

Classes in participants schools are randomly allocated to receive either the Me, You & Us intervention or to continue having their usual curriculum. The Me, You & Us programme involves six 50 minute lessons and is delivered by the participants' usual school teachers. All students are asked to complete a series of questionnaires at three times: before the lessons started, after the lessons finished and three months later. These questionnaires focus on eating habits, body satisfaction, friendships, mood and self-esteem. They take no longer than 45 minutes to complete and are administered by school staff during the normal school day.

What are the possible benefits and risks of participating?

Participants are offered a £10 shopping voucher on completion of the questionnaires as a gesture of appreciation of the time spent taking part. In addition, the school receives £10 per student taking part in recognition of the time and effort required to run the study. There are no risks of physical harm from taking part in this study. There is a small chance that students may find answering questions about eating or body satisfaction to be upsetting. However, students are reminded that they do not have to answer any questions that they do not want to and their teacher is present at all times to provide support if needed.

Where is the study run from?
King's College London (UK)

When is the study starting and how long is it expected to run for?
June 2011 to September 2012

Who is funding the study?
National Institute for Health Research (NIHR) (UK)

Who is the main contact?
1. Ms Helen Sharpe
Helen.sharpe@kcl.ac.uk
2. Prof. Ulrike Schmidt
Ulrike.schmidt@kcl.ac.uk

Study information

Scientific Title
Me, You & Us: a programme for preventing eating disorders in UK secondary schools - a cluster randomised controlled trial

Acronym

Study objectives

Main hypothesis:

Students receiving the intervention will show significant improvements in body esteem, internalisation, peer support, appearance conversations, depressive symptoms, self-esteem and eating pathology compared to students in the control group at post-intervention and at a three month follow up.

Subsidiary hypotheses:

1. Students will find the material in the intervention acceptable, in that they will report enjoying the lessons and perceive them as useful.
2. It will be feasible to train usual secondary school teachers to deliver an eating disorder prevention programme from a manual and student workbook with high fidelity.

Ethics approval required

Health condition(s) or problem(s) studied

Eating disorders / body dissatisfaction

Interventions

Participants in classes allocated to the intervention arm received six 50 minute sessions outlined in the Me, You & Us manual, focusing on media literacy, peer interactions, boosting mood and self-esteem. The sessions were delivered as part of the usual school day by teachers in participating schools. Teachers received a two hour training session on the material prior to delivery. Specific content of the sessions can be obtained from the contact details listed below.

Participants in classes allocated to the control arm received no intervention (curriculum as usual). Lessons provided will be those usually given by school staff.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Participant self-reported body esteem, assessed by the 23-item Body Esteem Scale for Adolescents and Adults. Questionnaires were administered at baseline, post-intervention and three-month follow-up

Secondary outcome measures

1. Participant self-reported questionnaires assessing:

1.1. Eating pathology (Eating Disorders Diagnostic Scale, 22 items)

1.2. Thin-ideal internalization (Sociocultural Attitudes Towards Appearance Scale Internalization, 9 items)

1.3. Appearance conversations with friends (Appearance Conversations with Friends Scale, 5 items)

1.4. Peer support (Multidimensional Scale of Perceived Social Support Friends, 4 items)

1.5. Depressive symptoms (Depression, Anxiety and Stress Scale, 21 items)

1.6. Self-esteem (1 item)

All questionnaires administered at baseline, post-intervention and three-month follow-up

2. In addition participants provided feedback on the acceptability of the intervention at post-intervention with two self-report items assessing how much students liked the lessons and how helpful they found the lessons

3. Feasibility of the mode of delivery was assessed through observations of two intervention lessons in each participating school, which were rated based on the number of activities outlined in the manual that were completed in the session

Overall study start date

01/06/2011

Completion date

30/09/2012

Eligibility

Key inclusion criteria

School inclusion criteria: UK based secondary school with students in years 8 and/or 9

Participant inclusion criteria: student (male or female) in year 8 or 9 in participating secondary school

Participant type(s)

Other

Age group

Child

Sex

Both

Target number of participants

1852

Key exclusion criteria

Participant exclusion criteria:

1. Lack of parental/carers consent
2. Insufficient English language ability to understand assent procedures or complete questionnaire measures

Date of first enrolment

01/06/2011

Date of final enrolment

30/09/2012
