## Additional identifiers

### Protocol serial number

N0016089960

## Study information

### Scientific Title

**Study objectives**

1. Is the functional outcome of arthroscopic stabilisation as good as, or superior to, conventional open stabilisation?
2. What is the pathological basis for the relatively poorer results in patients with atraumatic instability?

**Ethics approval required**

Old ethics approval format

**Ethics approval(s)**

Not provided at time of registration

**Study design**

Randomised prospective clinical controlled trial

**Primary study design**

Interventional

**Study type(s)**

Treatment

**Health condition(s) or problem(s) studied**

Arthroscopic stabilisation

**Interventions**

Patients are randomised to:

1. Arthroscopic shoulder stabilisation
2. Open shoulder stabilisation

**Intervention Type**

Other

**Phase**

Not Specified

**Primary outcome(s)**

Comparison of both types of surgery. Dissemination of results.

**Key secondary outcome(s)**

Not provided at time of registration

**Completion date**

31/03/2006

**Reason abandoned (if study stopped)**

Lack of participants and funding

**Eligibility****Key inclusion criteria**

100 orthopaedic patients from Charing Cross Hospital.

**Participant type(s)**

Patient

**Healthy volunteers allowed**

No

**Age group**

Not Specified

**Sex**

Not Specified

**Key exclusion criteria**

Not provided at time of registration

**Date of first enrolment**

01/04/1999

**Date of final enrolment**

31/03/2006

**Locations**

**Countries of recruitment**

United Kingdom

England

**Study participating centre**

Orthopaedic & Trauma Surgery

London

United Kingdom

W6 8RF

**Sponsor information**

**Organisation**

Department of Health (UK)

**Funder(s)**

**Funder type**

Government

**Funder Name**

Hammersmith Hospital NHS Trust (UK)

## **Results and Publications**

**Individual participant data (IPD) sharing plan****IPD sharing plan summary**
