Study information

Scientific Title

Acronym
R'mabcGVHD

Study objectives
B cells contribute to the development of chronic Graft Versus Host Disease (cGVHD).

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethics approval received from the local medical ethics committee

Study design
Non-randomised trial

Primary study design
Interventional

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Chronic Graft Versus Host Disease (cGVHD)

Interventions
Treatment with Rituximab once a week, for four weeks.

Intervention Type
Drug

Phase
Not Specified

Drug/device/biological/vaccine name(s)
Rituximab

Primary outcome(s)
Proportion of complete and partial responses:
A complete response will be defined as a complete resolution of clinical evidence of chronic GVHD.
A partial response will be defined by an improvement in any of the affected organs.

Key secondary outcome(s))
Proportion of patients with a histological response.

Completion date
01/07/2008

Eligibility

Key inclusion criteria
1. Aged over 18 years
2. Steroid refractory chronic GVHD, including skin localisation
3. No other treatment apart from steroids and when applicable standard GVHD prevention

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Lower age limit
18 years

Sex
All

Key exclusion criteria
1. Relapse with a life expectancy of less than six months
2. Severe infections

Date of first enrolment
01/07/2006

Date of final enrolment
01/07/2008

Locations
