Study information

Scientific Title
VITAL Germany (Valdoxan® improves treatment of depression and daytime activity in real life) : an observational prospective multicentre study

Acronym
VITAL Germany

Study objectives
Effects of Valdoxan® therapy on depressive symptoms, daytime well-being and compliance in adult patients with episodes of major depression under daily routine in an observational prospective multicentre trial by psychiatrists and general practitioners.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Freiburger Ethics Committee International approved on 25/10/2010 (ref: 010/2141)

Study design
Observational prospective multicentre study

Primary study design
Observational

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Episodes of major depression

Interventions
1. Get information on Valdoxan® therapy under daily routine practice by psychiatrists and general practitioners:
1.1. Changes in depressive symptoms under daily routine conditions via CGI (Clinical Global Impressions)
1.2. Effects of the therapy on depressive symptoms and daytime well-being via patients-questionnaire Beck Depression Inventory (BDI-II) and Circ-Screen questions 5 and 6
1.3. Compliance via standardised questions to the patients
2. Get information about how Valdoxan® SmPC and patients information are followed via standardised documentation of the dosage of Valdoxan®, of comedications and concomittant diseases
3. Analysis of the general tolerability of Valdoxan® under routine conditions via standardised adverse drug reactions' documentation and standardised documentation of therapy discontinuation
4. Analysis of unknown adverse drug reactions via standardised documentation
5. Get further information on known adverse drug reactions under routine practice via standardised adverse drug reactions' documentation and laboratory parameter (liver function testing)

Study duration is about 6 months.

Intervention Type
Drug

Phase

Not Applicable

Drug/device/biological/vaccine name(s)
Valdoxan®

Primary outcome(s)
1. Get informations on Valdoxan® therapy under daily routine practice by psychiatrists and general practitioners:
1.1. Changes in depressive symptoms under daily routine conditions via CGI (Clinical Global Impressions): measured at U0 (inclusion), U2 (after 2 weeks), U3 (after 6 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)
1.2. Effects of the therapy on depressive symptoms and daytime well-being via patient-questionnaire Beck Depression Inventory (BDI-II) and Circ-Screen questions 5 and 6: measured at U0 (inclusion), U2 (after 2 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)
1.3. Compliance via standardised questions to the patients: measured at U0 (inclusion), U2 (after 2 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)
2. Get information about how Valdoxan® SmPC and patients information are followed via standardised documentation of the dosage of Valdoxan® and of comedications (measured at U0 [inclusion], U2 [after 2 weeks], U3 [after 6 weeks], U4 [after 12 weeks] and U5 [after 24 weeks]) and concomitant diseases (measured at U0 [inclusion])
3. Analysis of the general tolerability of Valdoxan® under routine conditions via standardised adverse drug reactions' documentation and standardised documentation of therapy discontinuation: measured at U2 (after 2 weeks), U3 (after 6 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)
4. Analysis of unknown adverse drug reactions via standardised documentation: measured at U2 (after 2 weeks), U3 (after 6 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)
5. Get further information on known adverse drug reactions under routine practice via standardised adverse drug reactions´documentation and laboratory parameter (liver function testing): measured at U2 (after 2 weeks), U3 (after 6 weeks), U4 (after 12 weeks) and U5 (after 24 weeks)

Key secondary outcome(s))
No secondary outcome measures

Completion date
31/03/2012

Eligibility

Key inclusion criteria
Adult patients with episodes of major depression

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Total final enrolment
3005

Key exclusion criteria
Does not meet inclusion criteria

Date of first enrolment
13/01/2011

Date of final enrolment
31/03/2012

Locations

Countries of recruitment
Germany

Study participating centre
Elsenheimer Str. 53
Munich
Germany
80687
