Study information

Scientific Title

Study objectives

To determine if a psycho-educational intervention is associated with significant clinical improvements

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders: Bipolar disorders

Interventions

Brief psycho-educational programme vs standard care plus biblio-therapy

Added 21 July 2008: trial discontinued in 2005

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Time to first relapse as assessed by independent blind reviewer.

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/10/2007

Eligibility

Key inclusion criteria

Subjects with bipolar disorder in contact with 3CMHT in Lewisham catchment area, inpatient units at Ladywell or by direct recruitment by GPs.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified
