Study information

Scientific Title

Randomised controlled trial of a brief GP intervention to reduce overweight in Victorian primary school children (LEAP)

Acronym

LEAP

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Overweight and mild obesity

Interventions

Arm A: Four consultations with the family doctor, employing a brief family-centred, solution-focussed approach aiming to increase physical activity and reduce fat and sugar intake.

Arm B: Standard identification and care.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Not provided at time of registration

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/07/2004

Completion date

31/12/2005

Eligibility

Key inclusion criteria

Healthy children aged 5.0-9.11 years who are overweight or mildly obese (International Obesity Task Force [IOTF] cutpoints; children with UK Body Mass Index [BMI] z-score ≥ 3.0 excluded). Sample drawn from BMI survey of all children aged 5.0-9.11 years attending their family doctor in 29 participating practices May-Dec 2002.

Participant type(s)

Patient

Age group

Child

Lower age limit

5 Years

Upper age limit

9 Years

Sex
