Study information

Scientific Title

Study objectives

To examine trial recruitment rates, protocol fidelity, treatment adherence, clinical outcome effect size, cost utility and acceptability of a standardised guided self help intervention within a pilot trial.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Depression

Interventions

Guided self-help for depression versus usual care

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

1. Clinical response at three months
2. Cost and health resource utility
3. Trial process measures (recruitment rates: treatment fidelity, intervention effect size, acceptability)

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/08/2007

Eligibility

Key inclusion criteria

Mild/moderate depression presenting in primary care

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

1. Depression not as primary diagnosis
2. Risk to self or others

Date of first enrolment

01/09/2005

Date of final enrolment

31/08/2007
