Study information

Scientific Title

Study objectives

To evaluate the effect of nebulized albuterol on tidal breathing flow-volume loops in infants with bronchiolitis due to Respiratory Syncytial Virus (RSV).

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Respiratory Syncytial Virus (RSV) bronchiolitis

Interventions

Compared the effect of nebulized albuterol versus nebulized saline on various parameters of tidal breathing flow-volume loops

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Albuterol

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/01/2001

Eligibility

Key inclusion criteria

One month to one year infants with Respiratory Syncytial Virus (RSV) positive bronchiolitis

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/01/2000

Date of final enrolment

01/01/2001
