# Study information

## Scientific Title

Randomised controlled trial of complete bowel preparation vs distal bowel cleansing in the management of patients referred under fast track guidelines for colorectal cancer

## Study objectives

Whis is preferable in the management of patients undergoing flexible sigmoidoscopy - complete bowel preparation or distal bowel cleansing?

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration

## Study design

Randomised controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Hospital

## Study type(s)

Treatment

## Participant information sheet

Not available in web format, please use the contact details to request a patient information sheet

## Health condition(s) or problem(s) studied

Cancer: Colorectal

## Interventions

1. Complete bowel preparation
2. Distal bowel cleansing

## Intervention Type

Procedure/Surgery

## Primary outcome measure

1. Patient satisfaction
2. Bowel preparation efficacy

**Secondary outcome measures**

Not provided at time of registration

**Overall study start date**

01/11/2003

**Completion date**

01/06/2006

## Eligibility

**Key inclusion criteria**

200 patients undergoing flexible sigmoidoscopy following fast track referral

**Participant type(s)**

Patient

**Age group**

Not Specified

**Sex**

Not Specified

**Target number of participants**

200

**Key exclusion criteria**

Inability to self-administer enema, diabetes mellitus (unless solely diet controlled)

**Date of first enrolment**

01/11/2003

**Date of final enrolment**

01/06/2006

## Locations

**Countries of recruitment**

England

United Kingdom

**Study participating centre**

**Taunton & Somerset Hospital**  
Taunton  
United Kingdom  
TA1 5DA
