Study information

Scientific Title

Comparative clinical trial of the safety and efficacy of KrytanteK Ofteno® formulated by Laboratorios Sophia S.A. de C.V. versus Combigan D® in the treatment of patients with primary open-angle glaucoma or ocular hypertension

Acronym

KOEG

Study objectives

There is no difference between the hypotensive effect of KrytanteK Ofteno® versus Combigan D® in patients with a diagnosis of primary open-angle glaucoma (POAG) and/or ocular hypertension with or without pseudoexfoliation.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Ethics approval received from the local ethics committee (Nuestra Señora de la Luz Hospital, Mexico City) on the 20th June 2008.

Study design

Multicentre, prospective, longitudinal, comparative, double-blind clinical trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Health condition(s) or problem(s) studied

Primary open angle glaucoma

Interventions

According to the random chart, 44 patients will receive over each eye one drop of a topical ophthalmic solution composed of timolol 0.5%, dorzolamide 2%, and brimonidine 0.2% in a fixed-combination formula (KrytanteK Ofteno®) developed by Laboratorios Sophia S.A. de C.V. each

12 hours. The other 44 patients will be administered one drop of Combigan D® over each eye every 12 hours; both medications will be administered during a period of 90 days. All the study articles will be labeled with a non-consecutive "code number" that is randomly-generated by computer.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

KrytanteK Ofteno®, Combigan D®

Primary outcome measure

Intraocular pressure, measured at days 0, 7, 15, 30, 60 and 90. In all days the measurement will be at 8:00 am.

Secondary outcome measures

1. Visual fields, evaluation at at days 0 and 90
2. Ocular surface fluorescein staining, measured at at days 0 and 90

Overall study start date

30/04/2008

Completion date

30/04/2009

Eligibility

Key inclusion criteria

1. Patients must have a clinical diagnosis of mild to moderate primary open-angle glaucoma (POAG) with or without pseudoexfoliation and pigmentary dispersion or ocular hypertension
2. Patients may be of both masculine or feminine genders and must be 18 years old or older
3. Patients with intraocular pressure between 21 - 30 mmHg

Participant type(s)

Patient

Age group

Adult

Lower age limit

18 Years

Sex

Both

Target number of participants

88 patients

Key exclusion criteria

1. Patients with one blind eye
2. Patients with visual acuity of 20/40 or worst in any of both eyes without a justifying cause
3. Patients with active stage history of any concomitant ocular disease besides the required one
4. Patients taking any medication, whether topically or by any route of administration, that decisively interferes in the study's results, until 48 hours previous to the day 1 of the trial or until a time period in which residual effects could be present
5. Sulfa allergy patients
6. Patients with history of hypersensitivity or any medical situation that contraindicates or makes the using of risky for any of the study articles or their compounds under any route of administration as well as any drug or formulation derived from them or related to them
7. Contact lenses users
8. Fertile-age women who are not using an adequate contraceptive method as well as pregnant or breast-feeding women
9. Patients with history of cataract surgery with or without IOL implant (Pseudoaphakia or aphakia) three months or less prior to day 1 of the trial
10. Patients enrolled in any medical trial out of the Laboratorios Sophia S.A. de C.V. sponsorship under the last 90 days prior to this trial
11. Legally disqualified or mentally disabled patients who cannot sign the informed consent to participate in this clinical trial
12. Patients who cannot comply with the medical appointments or with all the protocol requirements
13. Patients who refuse to participate in this clinical trial
14. Patients with optic disc excavation equal to 0.8 or more
15. Normal-tension glaucoma patients
