Study information

Scientific Title

Study objectives

To evaluate whether a specially designed teacher-delivered sex education programme for young people aged 13-15 has any effect on sexual risk taking and the incidence of unwanted sexual outcomes

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Public health, social medicine

Interventions

Teacher-delivered sex education programme/control

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Cumulative termination rate by age 20 and reported incidence of first intercourse without a condom.

Key secondary outcome(s)

Cognitions associated with safer sex, reported coercive sexual encounters, regretted sexual experience, use of sexual health services, etc.

Completion date

25/06/2005

Eligibility**Key inclusion criteria**

Non-denominational secondary state schools in Tayside and Lothian Regions and pupils attending these schools.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Sex

Female

Key exclusion criteria

Roman Catholic schools and pupils who opt out of the research.

Date of first enrolment

01/01/1996

Date of final enrolment

25/06/2005
