Study design

Randomised controlled trial.

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Diagnostic

Participant information sheet

Health condition(s) or problem(s) studied

Cardiovascular diseases: Thromboembolic disease

Interventions

Guideline - national guidelines for prophylaxis of deep vein thromboembolism based on systematic review, developed by multi-disciplinary group and evidence-linked recommendations:

1. Educational outreach visits to ward staff
2. Reminder systems at the times of consultation
3. Role substitution involving nursing or pharmacy staff assessing patients' risk status

Intervention Type

Other

Phase

Not Specified

Primary outcome measure
