Study information

Scientific Title

A randomised phase III trial of gemcitabine in paclitaxel-containing, epirubicin-based, adjuvant chemotherapy for women with early stage breast cancer

Acronym

TANGO

Study objectives

In women with early stage breast cancer, the addition of gemcitabine to paclitaxel-containing, epirubicin-based, adjuvant chemotherapy provides significantly superior disease-free and overall survival, without excess toxicity or prolonged adverse impact on quality of life.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Breast cancer

Interventions

Control arm: Epirubicin 90 mg/m^2 (day one) + Cyclophosphamide 600 mg/m^2 (day one); four cycles, three weekly intervals followed by Paclitaxel 175 mg/m^2 (day one); four cycles at three weekly intervals.

Research arm: Epirubicin 90 mg/m^2 (day one) + Cyclophosphamide 600 mg/m^2 (day one); four cycles at three weekly intervals followed by Gemcitabine 1250 mg/m^2 (days one and eight) + Paclitaxel 175 mg/m^2 (day one); four cycles at three weekly intervals.

Intervention Type

Drug

Phase

Drug/device/biological/vaccine name(s)

Epirubicin, cyclophosphamide, paclitaxel, gemcitabine

Primary outcome(s)

Five-year disease-free survival

Key secondary outcome(s))

Ten-year overall survival, toxicity, dose intensity, tolerability and serious adverse events

Completion date

26/11/2004

Eligibility

Key inclusion criteria

- 1. Histological diagnosis of invasive breast carcinoma
- 2. Completely resected early stage disease
- 3. Definite indication for adjuvant chemotherapy
- 4. Any nodal status
- 5. Any hormone receptor status
- 6. Fit to receive either of the trial chemotherapy regimens. Adequate bone marrow, hepatic, and renal function.
- 7. Eastern Cooperative Oncology Group (ECOG) performance status of zero to two
- 8. Written informed consent
- 9. No previous chemotherapy or radiotherapy
- 10. Radiotherapy intent is known (this must be stated at the point of randomisation)
- 11. Randomisation within eight weeks of surgery, but ideally within one month
- 12. No previous malignancy except basal cell carcinoma or cervical carcinoma in situ, unless disease-free for ten years, after surgical treatment only
- 13. Non-pregnant and non-lactating, with no intention of pregnancy during chemotherapy, and prepared to adopt adequate contraceptive measures if pre-menopausal and sexually active
- 14. No concomitant medical or psychiatric problems that might prevent completion of treatment or follow-up

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria

Any of the above criteria not satisfied

Date of first enrolment

22/08/2001

Date of final enrolment

26/11/2004
