Study information

Scientific Title

Acronym

CBTHA

Study objectives

Comprison of the effectiveness of cognitive behaviour therapy focused on health anxiety in a GenitoUrinary Medicine (GUM) clinic compared with treatment as usual.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Approval received from the North Nottinghamshire Local Research Ethics Committee on the 15th May 2002 (ref no: NNHA/600).

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Health anxiety (hypochondriasis)

Interventions

Active Treatment Group:

Up to seven sessions of individual cognitive behaviour therapy together with a booklet describing cognitive behaviour therapy in health anxiety (14 pages)

Control Group:

Single interview within the clinic explaining the concept of health anxiety (control group)

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Reduction in Health Anxiety Inventory scores (HAI) at six months

Secondary outcome measures

1. HAI at 12 months
2. Changes in social function, anxiety and depression scores at three, six and 12 months

Overall study start date

01/05/2002

Completion date

30/11/2006

Eligibility**Key inclusion criteria**

Outpatients presenting to the GUM clinic at Kings Mill Hospital, Sutton-in-Ashfield, Nottinghamshire and felt to be suffering from health anxiety by any doctor in the clinic (including HS) were given the Health Anxiety Inventory (HAI) and those with a score of 18 or over invited to take part in the study if they were resident in the area, had sufficient command of English to understand the questionnaires and gave written informed consent for research assessment and examination of patient records.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

50

Key exclusion criteria

Psychotropic drug treatment taken in the previous six months before entry to the study and current psychiatric care.

Date of first enrolment

01/05/2002

Date of final enrolment

30/11/2006
