Participant information sheet

Health condition(s) or problem(s) studied

Schizophrenia and other psychoses

Interventions

Randomised trial with three groups:

1. Computer intervention combining information from patient's medical record with general information about schizophrenia
2. Sessions with a community psychiatric nurse (CPN)
3. (Combination) First and last sessions with the CPN and remainder with the computer. Each intervention had five educational sessions.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Patient attendance, opinions, change in knowledge and psychological state; costs of the interventions and patients; use of NHS community services; modelling of costs for these three, and alternative, interventions.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/01/1997

Completion date

01/12/1999

Eligibility

Key inclusion criteria

112 patients with schizophrenia, in contact with community services; 67 completed follow up.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

112

Key exclusion criteria

Does not match inclusion criteria
