# Study information

## Scientific Title

## Study objectives

To develop, and then compare use, effect and cost of personalised computer education with community psychiatric nurse (CPN) education, for patients with schizophrenia.

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration

## Study design

Randomised controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Other

## Study type(s)

Other

## Participant information sheet

## Health condition(s) or problem(s) studied

Schizophrenia and other psychoses

## Interventions

Randomised trial with three groups:

1. Computer intervention combining information from patient's medical record with general information about schizophrenia
2. Sessions with a community psychiatric nurse (CPN)
3. (Combination) First and last sessions with the CPN and remainder with the computer. Each intervention had five educational sessions.

## Intervention Type

Other

## Phase

Not Specified

## Primary outcome measure

Patient attendance, opinions, change in knowledge and psychological state; costs of the interventions and patients; use of NHS community services; modelling of costs for these three, and alternative, interventions.

**Secondary outcome measures**

Not provided at time of registration

**Overall study start date**

01/01/1997

**Completion date**

01/12/1999

## Eligibility

**Key inclusion criteria**

112 patients with schizophrenia, in contact with community services; 67 completed follow up.

**Participant type(s)**

Patient

**Age group**

Not Specified

**Sex**

Not Specified

**Target number of participants**

112

**Key exclusion criteria**

Does not match inclusion criteria

**Date of first enrolment**

01/01/1997

**Date of final enrolment**

01/12/1999

## Locations

**Countries of recruitment**

Scotland
