## Plain English summary of protocol

### Background and study aims

Past research has demonstrated the importance of oral language skills and their link to learning to read. Children from low-income backgrounds are at risk of delayed language development and educational disadvantage. Interventions that promote oral language in the early years have the possibility to improve children's learning and development, particularly for those from deprived backgrounds. Parents and Children Together (PACT) is a parent-delivered early language teaching programme that aims to help preschool children learn new words, listen to and talk about stories, understand and tell stories, and enjoy books and reading.

The PACT intervention has been the focus of two previous randomised control trials - the first was delivered by the PACT developer team and showed that PACT could improve children's language skills. The second PACT trial (PACT-2) had an independent evaluator but was disrupted by the Covid-19 outbreak and response, affecting both the programme delivery and the evaluation. A third PACT trial (PACT-3) was therefore funded by the Education Endowment Foundation to investigate whether the PACT programme improves children's language skills and how the PACT programme is delivered.

### Who can participate?

Pre-school children (3-4 years old), their parents/carers, and nursery staff.

### What does the study involve?

Nursery children are randomly allocated to either the PACT group (who get the programme) or a comparison group (who do not get the programme). The children's language skills are tested at the start and end of the project to see if there was any difference between the two groups. They are also tested again after an 11 month delay when the children are then at school.

After attending a two hour online training session, parents and children in the PACT group commence the 30-week parent/child reading programme. This consists of six 5-week teaching 'blocks' that each encompass a different theme which aligns to common early-years themes including: (1) Animals, (2) The World Around Us, (3) Journeys, (4) The Body, (5) Home, and (6)

Places and People. Each PACT 'block' includes four storybooks and each book has an activity book including all activities and related resources to enable parents/carers to deliver a scripted 20 minutes interactive learning session, five times a week. Each block also contains a 'Bringing it all Together' activity book which features consolidation and theme-level activities. Each PACT session should last around 20 minutes and should include all listed activities and should follow a consistent structure and routine.

Parents are requested to complete a daily record form through a mobile application to gauge session completion and whether the pair enjoyed it. In any cases where families are unable to use the mobile app, paper copies of this form will be provided.

Parents are asked to complete a survey about their child's home learning environment at the beginning of the trial and at the end of the intervention period. The child's nursery teacher will also complete a school readiness questionnaire at the end of the intervention period.

Families allocated to the comparison group will receive a pack of books up to a value of £130 at the end of the intervention period to thank them for their participation in the programme.

What are the possible benefits and risks of participating?

#### **Benefits**

Possible benefits include improving the language skills development, early literacy skills, home learning environment and school readiness of children aged 3-4 years old. The programme may also help parents/families to support their child's learning.

#### **Risks**

The intensity of the programme may mean that families struggle to complete it and may get distressed or upset trying to find the time to fit all the programme sessions in.

Where is the study run from?

University of Durham (UK)

University of Manchester (UK)

When is the study starting and how long is it expected to run for?

March 2021 to June 2024

Who is funding the study?

Education Endowment Foundation (UK)

Who is the main contact?

Victoria Menzies, Principal Investigator, Durham University

#### **Study website**

<https://sites.manchester.ac.uk/pct/>

## **Contact information**

#### **Type(s)**

Principal Investigator

#### **Contact name**

Mrs Victoria Menzies

## Additional identifiers

### EudraCT/CTIS number

Nil known

### IRAS number

### ClinicalTrials.gov number

Nil known

### Secondary identifying numbers

DU/PACT-3/RT/3293

## Study information

### Scientific Title

Evaluating the impact of the Parents and Children Together (PACT) programme on the language skills of preschool children, a two-armed cluster randomised trial [PACT-3]

### Acronym

PACT-3

### Study objectives

Main study hypothesis

Language skills will improve more for children in the PACT intervention group than for those in the 'business as usual' comparison group.

### Research questions

RQ1. What is the impact of the PACT intervention on language skills immediately after the intervention period, at the end of nursery, as measured by the LanguageScreen assessment? [Primary Outcome]

RQ2. What is the impact of the PACT intervention on language skills 11 months after the intervention period, as measured by the LanguageScreen assessment? [Secondary Outcome]

RQ3. What is the impact of the PACT intervention on the specific language domains of receptive vocabulary measured by the British Picture Vocabulary Scale (BPVS), expressive vocabulary measured by CELF Preschool 2 Expressive Vocabulary subscale (CELF EV) and spoken language information and grammar measured by the Renfrew Action Picture test (APT Information, APT Grammar) immediately after the intervention period, using researcher-delivered assessments [Secondary Outcome]?

RQ4. What is the impact of the PACT intervention on the specific language domains of receptive

vocabulary (measured by the BPVS), expressive vocabulary (measured by CELF EV) and information and grammar in spoken language (measured by APT Information and APT Grammar) 11 months after the intervention period, using researcher-delivered assessments [Secondary Outcome]?

RQ5. What is the impact of PACT on school readiness immediately after the intervention period measured using teacher-completed Brief Early Skills and Support Index (BESSI)? [Secondary Outcome]

RQ6. What is the impact of PACT on the home learning environment as measured using the parent/carer-completed Home Learning Environment Index (HLE) at the end of the intervention period? [Secondary Outcome]

RQ7. What is the impact of PACT on early literacy skills as measured 11 months after the intervention period using the York Assessment of Reading Comprehension (YARC) assessment? [Secondary Outcome]

### **Ethics approval required**

Old ethics approval format

### **Ethics approval(s)**

Approved 11/03/2021, Durham University's School of Education Ethics Committee (School of Education, Leazes Road, Durham University, Durham DH1 1TA, UK; no telephone number provided; ed.ethics@durham.ac.uk), ref: EDU-2022-02-04T14\_38\_37-jxjx34

### **Study design**

Two-armed cluster randomized controlled efficacy trial

### **Primary study design**

Interventional

### **Secondary study design**

Cluster randomised trial

### **Study setting(s)**

Childcare/pre-school, School

### **Study type(s)**

Other, Efficacy

### **Participant information sheet**

Not available in web format, please use contact details to request a participant information sheet

### **Health condition(s) or problem(s) studied**

Educational development of pre-school children aged 3-4 with programme specifically targetting language skills, home learning environment and school readiness.

### **Interventions**

This research uses a two-armed randomised controlled efficacy trial design delivered under ideal conditions with allocation at child level but with pupils nested within school nurseries. Children will be allocated into one of two groups on a 1:1 ratio to:

Intervention – children allocated to receive the Parents and Children Together (PACT) home reading programme

Control – children allocated to ‘business as usual’ nursery and home practice plus equivalent incentive cost of materials (approximately £130) in books to parents/carers at the end of nursery and the end of the intervention period.

Randomisation will stratify so that there are equal numbers (where possible) of participants within schools as well as equal numbers assigned to intervention and control groups across the full sample. Stratification will also account for completeness of pre-testing so that participants who have not completed the pre-testing at the time of random allocation are balanced between the intervention and control groups.

The PACT intervention is an early language teaching programme delivered by parents or carers to their pre-school child in the year before they start school (aged 3 to 4 years). It is an intensive programme delivered over a period of thirty weeks with focused language activities based on story books provided by the programme to be completed five days a week, for approximately 20 minutes a day. There are two levels of delivery in the programme with parents/carers signing up to and accessing the programme and programme support through their child’s nursery and then delivering the programme sessions directly to their child at home. Training is provided at both levels: for the nursery staff driving the programme (PACT Lead) and for the parents. In this trial the PACT programme will be delivered by families between November 2021 and June 2022. PACT Lead training is provided in May 2021 and Parent/Carer training in November 2021.

## **Intervention Type**

Behavioural

## **Primary outcome measure**

Language skills are measured using the LanguageScreen assessment which will be collected by a member of staff in the child's nursery at baseline (September 2021) and immediately after the intervention delivery period (June/July 2022) as well as 11 months post intervention (May/June 2023). The primary outcome measure will be a latent variable created using 4 LanguageScreen subscale standardised scores (Expressive vocabulary, Receptive Vocabulary, Listening Comprehension and Sentence Repeition) as in the PACT-2 trial also funded by EEF.

## **Secondary outcome measures**

1. Specific domains of Language Skills using researcher-delivered standardised tests at immediate post-test (June/July 2022) and 11 month delayed post-test:
  - 1.1. Expressive vocabulary as measured using Clinical Evaluation of Language Fundamentals 2 UK (CELF-Preschool 2 UK) – Expressive vocabulary subscale raw score
  - 1.2. Receptive vocabulary as measured by British Picture Vocabulary Scale – 3 (BPVS-3) raw score
  - 1.3. Grammar and information giving abilities as measured by the Renfrew Action Picture Test (APT), information score and grammar score
2. Early literacy skills as measured at 11 month delayed post-test (May/June 2023) using Early Word Reading, Letter-Sound Knowledge and Sound deletion subtest from York Assessment of Reading Comprehension (YARC).
3. Child’s home learning environment measured by the parent-reported Home Learning Environment Index (HLE) at baseline (September 2021) and immediate post-test (June/July 2022)
4. Specific domains of language skills (assessed by LanguageScreen subtest scores) at baseline, immediate post-test (June/July 2022) and 11 month delayed post-test (May/June 2023)
5. School readiness, measured by teacher reported Brief Early Skills and Support Index (BESSI) at immediate post-test (June/July 2022).

**Overall study start date**

11/03/2021

**Completion date**

30/06/2024

## **Eligibility**

**Key inclusion criteria**

School level inclusion criteria

To be included schools must:

1. Be state- funded and have a nursery which is administratively part of the school setting
2. Be located in areas with high scores on the Indices of Multiple Deprivation (including Warrington, Bolton, Rochdale, Lancashire, Tameside, and Blackpool)
3. Agree to all study requirements outlined in the Memorandum of Understanding (MoU) which describe their commitment to the delivery of PACT and participation of a minimum number of families (n=4) in the trial and administration of research measures
4. Agree to and sign a project specific Data Sharing Agreement (DSA)

Child level inclusion criteria

To be included the child must:

1. Be 3 or 4 years old by September 2021 and attend a participating nursery in the year before they start school
2. Have someone within a their household who is able to access the resources by having a basic level of English.
3. Not have a sibling in the same target year group
4. Not have a suspected or diagnosed developmental or learning difficulty
5. Not be part of a family which took part in a previous PACT trial

**Participant type(s)**

Learner/student, Other

**Age group**

Child

**Lower age limit**

3 Years

**Upper age limit**

4 Years

**Sex**

Both

**Target number of participants**

50 schools

**Total final enrolment**

43

## **Key exclusion criteria**

### **School level Exclusion Criteria**

1. Schools that do not have a nursery within the school
2. Schools out of area for the project (outside of the North West)
3. Schools who are unable to recruit at least 4 children to take part in the trial
4. Non- statefunded schools

### **Child level Exclusion Criteria**

1. Children who are not due to start school in following September
2. Children who do not have someone with a basic level of English in their household
3. Children who have a sibling in the same target year group
4. Children with a suspected or diagnosed developmental or learning difficulty
5. Children where the family has previously taken part in a PACT trial

### **Date of first enrolment**

21/03/2021

### **Date of final enrolment**

30/09/2021

## **Locations**

### **Countries of recruitment**

England

United Kingdom

## Results and Publications

**Publication and dissemination plan**

Trial protocol to be published on the Education Endowment Foundation (EEF) website (<https://educationendowmentfoundation.org.uk/>)

Trial SAP to be published on the EEF website

Main report expected to be peer-reviewed and published by the EEF on their website

Report addendum for delayed post-test data expected to be published by the EEF

Publication in high-impact peer-reviewed academic journals is also planned but not until after the EEF reports have been published.

UPDATE 12/07/2024: Main report and report addendum combined into one larger report published in May 2024.

Trial protocol (peer reviewed) published on EEF webpage here

<https://educationendowmentfoundation.org.uk/projects-and-evaluation/projects/pact-parents-and-children-together-regrant> on 28th June 2022.

Trial SAP published on EEF webpage here <https://educationendowmentfoundation.org.uk/projects-and-evaluation/projects/pact-parents-and-children-together-regrant> on 13th October 2022.

**Intention to publish date**

30/06/2023

**Individual participant data (IPD) sharing plan**

At the end of the project, Durham University will share participating children's data with the EEF's Data Archive through secure data portals. At that point EEF will become the data controller for the data in the archive. The data will be shared with the Department for Education (DfE), the EEF, EEF's archive manager, the Office for National Statistics (ONS) and potentially other research teams, subject to the appropriate approvals. Data will be matched with the National Pupil Database (NPD) for analysis after the trial. Further matching to the NPD other administrative data may take place during subsequent research to better understand the impact of the project.

Education Endowment Foundation will act as the data controller for the archive, which is managed on their behalf by FFT and held in the ONS Secure Research Service. While the archive does not contain any information that can be used to directly identify an individual pupil, Durham University will submit personal information and identifiers to the archive to allow the EEF to match to the NPD and obtain the Pupil Matching Reference (PMR) which is an identifier used by the DfE to enable the linking of archive data to the NPD longer term. This will then be stored in the archive and the identifying fields removed.

It will not be possible to share the data for the primary outcome measure, LanguageScreen, with the archive due to the license agreed with the publisher of LanguageScreen, OxEEd. However, other baseline and secondary outcome measures will be including in the data submission to the archive.

Participants are aware of the data sharing (through information sheets and privacy notices) and agreed to this.

**IPD sharing plan summary**
