Study information

Scientific Title

_

Study objectives

The large implementation of SMOCC will be more (cost-)effective than the usually applied basic dissemination strategies for guidelines.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Ethics approval received from the local medical ethics committee

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Chronic Obstructive Pulmonary Disease (COPD), smoking.

Interventions

Large scale implementation of a combined strategy, aimed at the complete GP practice team (education by consultant at the practice, help with detecting smoking COPD patients, supplying materials for patient education, helpdesk/website, reminders by e-mail and phone) versus usual care.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Primary outcome measures will be biochemically validated smoking abstinence at 12 and 18 months.

Secondary outcome measures

Secondary outcome measures will be counseling contacts and counseling behaviour of professionals and cessation attempts of patients.

Overall study start date

01/01/2006

Completion date

01/11/2008

Reason abandoned (if study stopped)

Participant recruitment issue

Eligibility

Key inclusion criteria

- 1. COPD
- 2. Smoking
- 3. Age 40 or more

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

2700 (open to recruitment)

Key exclusion criteria

- 1. Under control of lung specialist
- 2. Not Dutch-speaking
- 3. Serious physical or psychiatric comorbidity
- 4. Age under 40

Date of first enrolment

01/01/2006

Date of final enrolment

01/11/2008
