Study information

Scientific Title

An evaluation of the health and economic impact of integrated management of childhood illness in Matlab, Bangladesh: a randomised experimental study

Acronym

MCE-Bangladesh

Study objectives

Child health interventions delivered as Integrated Management of Childhood Illness (IMCI) will achieve greater improvements in health status and be more cost-effective than when reliance is placed on similar, but vertically organised health programmes.

Ethics approval required

Old ethics approval format

Ethics approval(s)

The Ethical Review Committee (ERC) of ICDDR,B is legally established body for the review research protocols involving humans under a specific Bangladesh law. The ERC has a Federal Wide Assurance (FWA) with the US Government (FWA#00001468). Ethics approval was gained on the 28th August 2006 (the reference number for this protocol from ERC of ICDDR, B is 1999-009).

Study design

Randomised trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Diseases and conditions included in IMCI: nutritional status and major causes of childhood death (including Acute Respiratory Illness [ARI], diarrhoea, and newborn conditions) and child health in general

Interventions

- 1. Facility-based Integrated Management of Childhood Illness (IMCI) interventions: started from March 2002 and is still ongoing
- 2. Community-based Integrated Management of Childhood Illness (IMCI) interventions: consists of different subcomponents which were gradually phased in from June 2003 and are still ongoing
- 3. Health systems support: started from March 2002 and is still ongoing

Principal Investigator: Shams El Arifeen ICDDRB GPO Box 128 Dhaka 1000 Bangladesh

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

- 1. Under-five mortality: baseline measured in 2000, midterm in intervention are in 2005 and end-of-project in 2007
- 2. Under-five nutritional status: baseline measured in 2000 and end-of-project in 2007

Key secondary outcome(s))

- 1. Quality, coverage and utilisation of IMCI services: baseline measured in 2000, and in 2003 and 2005
- 2. Client satisfaction: measured continuously from June 2003
- 3. Family and community practices related to IMCI: measured continously from 2002
- 4. Costs and cost-effectiveness of IMCI implementation: baseline measured in 2000 and end-of-project in 2007

Completion date

31/12/2007

Eligibility

Key inclusion criteria

All under-five children and their caretakers who are residents of the study area.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Upper age limit

5 years

Sex

Total final enrolment

350000

Key exclusion criteria

Do not meet the criteria above.

Date of first enrolment

01/10/1999

Date of final enrolment

31/12/2007

Locations

Countries of recruitment

Bangladesh

Switzerland

Study participating centre

Department of Child and Adolescent Health and Development

Geneva-27 Switzerland CH-1211
