Study information

Scientific Title

Acronym

Mitomycin C Project

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Chronic Rhinosinusitis (CRS) of the frontonasal recess

Interventions

Application of MMC/placebo following ESS and assessment for impact on symptoms of CRS

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/01/2006

Eligibility**Key inclusion criteria**

Patients who will be undergoing normal surgical procedure following the failure of medical treatment.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/01/2004

Date of final enrolment

01/01/2006

Locations**Countries of recruitment**

United Kingdom

England

Study participating centre**Professorial Unit**

London

United Kingdom

WC1X 8DA
