Study information

Scientific Title

Study objectives

What rate should the pace-makers be set at to cope with the bradycardia which almost invariably is induced by beta blocker?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Partially single blinded cross over design

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Cardiovascular: Congestive heart failure (CHF)

Interventions

The patients undergo a randomised comparison of the short term effects of different pacing modes.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/03/2003

Eligibility

Key inclusion criteria

Not provided at time of registration

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
