### Secondary identifying numbers

13650008

## Study information

### Scientific Title

Evaluation of a Multifactorial Intervention of Fall Prevention in Psycho-Geriatric Nursing Home Patients

### Acronym

EMIFPPGNHP

### Study objectives

Implementation of a multifactorial intervention on fall prevention in psycho-geriatric nursing home patients will decrease the number of falls.

### Ethics approval required

Old ethics approval format

### Ethics approval(s)

Medical Research Ethics Committee (METC) SRL/iRv (reference number: 030016), approval received on the 13th November 2003.

### Study design

Interventional, randomised, controlled trial

### Primary study design

Interventional

### Secondary study design

Randomised controlled trial

### Study setting(s)

Other

### Study type(s)

Prevention

### Participant information sheet

### Health condition(s) or problem(s) studied

Falls and fall-related injuries

### Interventions

Intervention group: applying a general medical assesment and an additional specific Fall Risk Evaluation (FRET) targeting general (institute-related) and specific (patient-related) fall preventive activities.

Control group: usual care.

### Intervention Type

Other

**Phase**

Not Specified

**Primary outcome measure**

Number of falls

**Secondary outcome measures**

Number of fall-related injuries

**Overall study start date**

01/11/2003

**Completion date**

01/03/2005

**Eligibility**

**Key inclusion criteria**

Psycho-geriatric nursing home patients

**Participant type(s)**

Patient

**Age group**

Senior

**Sex**

Both

**Target number of participants**

360

**Total final enrolment**

518

**Key exclusion criteria**

Somatic patients

**Date of first enrolment**

01/11/2003

**Date of final enrolment**

01/03/2005

**Locations**

**Countries of recruitment**

Netherlands

**Study participating centre**
