Health condition(s) or problem(s) studied

Cardiovascular: Stroke

Interventions

More physiotherapy vs standard

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Timed 10 metre walk, questionnaire to establish if there is an improvement in function.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/05/2003

Completion date

01/05/2004

Eligibility

Key inclusion criteria

Stroke patients. 12 in each group.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

20
