Study information

Scientific Title

Study objectives

Travoprost is a new prostaglandin analogue recently approved for treatment of ocular hypertension and glaucoma.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Eye Diseases: Glaucoma

Interventions

Prospective randomised controlled observer blinded clinical trial.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

The primary clinical outcome measure is diurnal IOP at follow up phasing: the major comparison is to be made between the IOP for travoprost treatment group and for the non-treatment group.

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/06/2006

Eligibility

Key inclusion criteria

Adults with normal tension glaucoma.

Participant type(s)

Patient

Healthy volunteers allowed

Age group

Adult

Sex

Not Specified

Key exclusion criteria

- 1. Patients on systemic medication
- 2. Patients who have undergone intraocular eye surgery

Date of first enrolment

01/04/2004

Date of final enrolment

01/06/2006

Locations

Countries of recruitment

United Kingdom

England
