Study information

Scientific Title

Acronym

EVS

Study objectives

The hypotheses to be tested are that the introduction of an electronic voting system (EVS) into a class environment enhances enjoyment of the learning experience and improves understanding and retention of knowledge of the material presented using the system in both the short and long-term.

Ethics approval required

Old ethics approval format

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Enhancing the learning experience

Interventions

EVS system for one group of students. Second group acting as a control.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Improved learning outcomes for students using EVS.

Key secondary outcome(s))

Improved enjoyment of tutorials for group using EVS.

Completion date

31/12/2001

Eligibility**Key inclusion criteria**

Students in their 4th year of medical education at the University of Adelaide.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

Students not in their 4th year of medical education at the University of Adelaide.

Date of first enrolment

01/01/2001

Date of final enrolment

31/12/2001
