# Study information

## Scientific Title

## Acronym

EVS

## Study objectives

The hypotheses to be tested are that the introduction of an electronic voting system (EVS) into a class environment enhances enjoyment of the learning experience and improves understanding and retention of knowledge of the material presented using the system in both the short and long-term.

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration

## Study design

Randomised controlled trial

## Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Other

## Study type(s)

Quality of life

## Participant information sheet

## Health condition(s) or problem(s) studied

Enhancing the learning experience

## Interventions

EVS system for one group of students. Second group acting as a control.

## Intervention Type

Other

## Phase

Not Specified

## Primary outcome measure

Improved learning outcomes for students using EVS.

**Secondary outcome measures**

Improved enjoyment of tutorials for group using EVS.

**Overall study start date**

01/01/2001

**Completion date**

31/12/2001

## **Eligibility**

**Key inclusion criteria**

Students in their 4th year of medical education at the University of Adelaide.

**Participant type(s)**

Patient

**Age group**

Adult

**Sex**

Both

**Target number of participants**

102

**Key exclusion criteria**

Students not in their 4th year of medical education at the University of Adelaide.

**Date of first enrolment**

01/01/2001

**Date of final enrolment**

31/12/2001

## **Locations**

**Countries of recruitment**

Australia

**Study participating centre**

**Dept. of Surgery**

Adelaide

Australia
