## Additional identifiers

### Protocol serial number

N/A

## Study information

Scientific Title

**Study objectives**

1. Potential to improve stroke knowledge following the implementation of an individualised information booklet
2. Assessment of new information tool and stroke knowledge assessment tool

**Ethics approval required**

Old ethics approval format

**Ethics approval(s)**

Approval was obtained from the local Research Ethics Committee

**Study design**

Randomised controlled feasibility trial

**Primary study design**

Interventional

**Study type(s)**

Prevention

**Health condition(s) or problem(s) studied**

Stroke

**Interventions**

Individualised information booklets.

**Intervention Type**

Other

**Phase**

Not Applicable

**Primary outcome(s)**

Knowledge of stroke risk factors and secondary prevention.

**Key secondary outcome(s)**

1. Satisfaction with information given
2. Utilisation of CareFile
3. Blood pressure targets

**Completion date**

01/03/2001

**Eligibility****Key inclusion criteria**

1. Confirmed stroke
2. All ages

3. Either sex

4. Patients who are discharged home and who can self complete a questionnaire, or who have a named carer who can do so

**Participant type(s)**

Patient

**Healthy volunteers allowed**

No

**Age group**

Adult

**Sex**

All

**Key exclusion criteria**

1. Patients with pre-existing cognitive impairment
2. Patients who are discharged to institutionalised care
3. Patients who are discharged home and who cannot complete questionnaires and have no other named carer who can do so

**Date of first enrolment**

01/04/2000

**Date of final enrolment**

01/03/2001

**Locations**

**Countries of recruitment**

United Kingdom

England

**Study participating centre**

c/o Stroke Research Office

Liverpool

United Kingdom

L7 7AL

**Sponsor information**

**Organisation**

University Hospital Aintree Research and Development (UK)
