Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Diverticular disease of the sigmoid colon

Interventions

Laparoscopic or open sigmoid resection

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Not provided at time of registration

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/04/2003

Completion date

30/04/2005

Eligibility

Key inclusion criteria

Patients scheduled for elective resection of the sigmoid colon because of diverticular disease

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

Not provided at time of registration

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/04/2003

Date of final enrolment

30/04/2005

Locations

Countries of recruitment

Germany

Study participating centre

Department of General, Visceral, Vascular and Thoracic Surgery

Berlin Germany 10117
