# Plain English summary of protocol

Not provided at time of registration

# Contact information

# Type(s)

Scientific

#### Contact name

Dr--

#### Contact details

UKCCCR Register Co-ordinator MRC Clinical Trials Unit 222 Euston Road London United Kingdom NW1 2DA

# Additional identifiers

ClinicalTrials.gov (NCT)

NCT00003240

Protocol serial number

LU3001

# Study information

#### Scientific Title

## **Study objectives**

Not provided at time of registration

## Ethics approval required

Old ethics approval format

## Ethics approval(s)

Not provided at time of registration

### Study design

Randomised controlled trial

### Primary study design

Interventional

## Study type(s)

## Health condition(s) or problem(s) studied

Lung (non-small cell) cancer

#### **Interventions**

- 1. Schedule A: Combination chemotherapy, four 3 weekly cycles of mitomycin, ifosfamide and cisplatin (MIC). Followed by radiotherapy as decided by the radiotherapist. The total minimum dose should not be less than 40 Gy in fifteen fractions and the field size adequate to encompass the known extent of the tumour.
- 2. Schedule B: Radiotherapy as decided by the radiotherapist. The total minimum dose should not be less than 40 Gy in fifteen fractions and the field size adequate to encompass the known extent of the tumour.

#### Intervention Type

Drug

#### Phase

**Not Specified** 

## Drug/device/biological/vaccine name(s)

Mitomycin, ifosfamide and cisplatin

#### Primary outcome(s)

Not provided at time of registration

## Key secondary outcome(s))

Not provided at time of registration

### Completion date

01/01/1996

# Eligibility

## Key inclusion criteria

- 1. Age 75 years or under
- 2. Histologically or cytologically proven non-small cell lung cancer, ie adeno- squamous or large cell carcinoma
- 3. Clinically or radiologically evaluable disease 4. Inoperable, but clinically limited stage disease
- 5. WHO performance status of 0-2
- 6. No previous chemotherapy or radiotherapy
- 7. No metastatic disease, except ipsilateral stem cell factor (SCF) lymphadenopathy
- 8. Normal renal function
- 9. No other previous or concurrent malignancy, except cone biopsied carcinoma in-situ of the cervix and adequately treated basal cell carcinoma of the skin
- 10. No pleural effusion or symptomatic superior vena cava obstruction
- 11. No pre-existing severe impairment of lung function likely to prejudice the safe administration of the proposed radiotherapy
- 12. No indication that protocol treatment would exacerbate a serious pre-existing medical condition

## Participant type(s)

Patient

### Healthy volunteers allowed

No

#### Age group

Adult

#### Sex

#### Key exclusion criteria

Not provided at time of registration

#### Date of first enrolment

01/01/1990

#### Date of final enrolment

01/01/1996

# Locations

#### Countries of recruitment
