Study information

Scientific Title

A CT-based system for the planning and navigation of hip resurfacing arthroplasty

Study objectives

Does a CT-based planning system improve accuracy and outcome in hip resurfacing arthroplasty?

Please note, due to funding problems a formal randomised controlled trial could not be done. Therefore, an informal trial randomised by operation list order alone was completed.

Participant information sheet

Health condition(s) or problem(s) studied

Surgery: Arthroplasty

Interventions

Prospective randomised controlled trial

Intervention Type

Procedure/Surgery

Phase

Not Applicable

Primary outcome measure

A CT-based navigation system will be shown to provide more reliable outcomes in hip resurfacing arthroplasty

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/06/2006

Completion date

01/07/2007

Eligibility

Key inclusion criteria

On list for hip resurfacing arthroplasty

Participant type(s)

Patient

Age group
