Study information

Scientific Title

Effects of a financial incentive on the response rate to an online questionnaire: a randomised controlled trial

Study objectives

To assess whether monetary incentives increase response rates to online questionnaires.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Institute for Research in the Social Sciences (IRISS) Ethics Committee, University of York, approved on 10/07/2008.

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Participant information sheet

Health condition(s) or problem(s) studied

Research dissemination

Interventions

Knowledge of incentive vs no knowledge of incentive. Gift vouchers (from Amazon.com, Inc.) to the value of £10 (British pounds) were to be given to all participants who completed the questionnaire. The questionnaire/invitation was first sent to the participants on 13 October 2008. Those who did not respond by 31 December 2008 were considered to be non-responders.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Rate of response between the two groups.

Secondary outcome measures

No secondary outcome measures

Overall study start date

13/10/2008

Completion date

19/12/2008

Eligibility

Key inclusion criteria

UK based principal investigators of health services and public health research completed 2003-2008 and (extramural) funded by the Chief Scientist Office, Economic and Social Research Council, Medical Research Council, NIHR Health Technology Assessment Programme, NIHR Service Delivery and Organisation Programme or Wellcome Trust.

Participant type(s)

Patient

Age group

Other

Sex

Both

Target number of participants

536

Key exclusion criteria

Any principal investigators not based in UK.

Date of first enrolment

13/10/2008

Date of final enrolment

19/12/2008
