Study information

Scientific Title

Social Anxiety Research Clinic: an exploratory randomised controlled trial of standard versus enhanced cognitive behavioural therapy for social anxiety in early psychosis

Acronym

SARC

Study objectives

Small pilot randomised therapy trial for people recovering from psychosis who are experiencing social anxiety.

Ethics approval required

Old ethics approval format

Ethics approval(s)

MREC, ref: 09/H0310/4

Study design

Single-centre randomised interventional treatment pilot/feasibility study

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Not available in web format, please use contact details to request a participant information sheet

Health condition(s) or problem(s) studied

Topic: Mental Health Research Network; Subtopic: Psychosis; Disease: Psychosis

Interventions

Cognitive behavioural intervention provided by graduate mental health workers.
Follow up length: 6 months

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Social Anxiety Interaction Scale

Secondary outcome measures

1. Paranoia Scale
2. Brief Core Schema Scale

Overall study start date

13/05/2009

Completion date

30/04/2010

Eligibility**Key inclusion criteria**

1. Score above 30 on the Social Interaction Anxiety Scale (SIAS)
2. Early Intervention Service user
3. Aged 14 years and above, either sex

Participant type(s)

Patient

Age group

Other

Sex

Both

Target number of participants

Planned sample size: 48; UK sample size: 48

Key exclusion criteria

Current acute psychotic episode

Date of first enrolment

13/05/2009

Date of final enrolment

30/04/2010
