Study information

Scientific Title

Acronym

MINT

Study objectives

An incentive of a £5 gift voucher will increase the return rate of postal questionnaires in a large randomised controlled trial (RCT) evaluating conservative treatments for Whiplash Association Disorders (WAD).

The main trial "Managing Injuries of the Neck Trial - MINT" is registered with ISRCTN33302125.

Please note that, as of 03/09/2009, the anticipated start and end dates of this trial have been updated from 08/06/2006 and 15/05/2008 to 01/11/2004 and 31/03/2009, respectively.

Ethics approval required

Old ethics approval format

Ethics approval(s)

The trial was approved by the Trent MREC on 28/04/2004. Each participating centre received approval from LREC.

Participant information sheet

Health condition(s) or problem(s) studied

Acute neck sprain (whiplash)

Interventions

Randomised 1:1 ratio to receive incentive or no incentive with follow-up questionnaire, either 4-month follow-up or, for those participants that have already passed the 4-month follow-up, 8-month follow-up.

Schedule of chase-up by the study team:

1st telephone call: 1 week after questionnaire sent out

2nd telephone call: 2 weeks after questionnaire sent out

If the questionnaire was not yet returned at this point, a second copy of questionnaire was sent.

3rd telephone call: 1 week after second questionnaire sent out

4th telephone call: 2 weeks after second questionnaire sent out

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Questionnaire return.

Secondary outcome measures

Number of questionnaires returned without chasing by the study team.

Overall study start date

01/11/2004

Completion date

31/03/2009

Eligibility

Key inclusion criteria

Participants in the Managing Injuries of the Neck Trial (MINT; registered with ISRCTN33302125) that have returned their baseline questionnaire.

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

2160

Key exclusion criteria
