Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Musculoskeletal Diseases: Frozen shoulder

Interventions

Comparison between physiotherapy and early MUA (manipulation under anaesthesia).

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Constant shoulder score, SC -36.

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/10/2004

Eligibility**Key inclusion criteria**

Patients presenting to shoulder clinic

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/10/2002

Date of final enrolment

01/10/2004
