Study information

Scientific Title

Study objectives

To establish whether outcome following hip arthroplasty surgery is affected by the type of minimally invasive surgical approach used.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Surgery: Total hip replacement

Interventions

Randomised controlled trial

Intervention Type

Procedure/Surgery

Phase

Not Applicable

Primary outcome(s)

Recovery and function

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/02/2007

Eligibility

Key inclusion criteria

Patients scheduled to undergo elective primary unilateral total hip replacement using an uncemented ABG II prosthesis

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/02/2005

Date of final enrolment

01/02/2007
