Study information

Scientific Title

Study objectives

To determine the efficacy of dihydrocodeine compared to methadone in the treatment of opiate dependence.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Opiate dependence

Interventions

Substitute treatment with methadone or dihydrocodeine.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Dihydrocodeine (DHC), methadone

Primary outcome(s)

1. Survival
2. Retention in treatment
3. Continued drug use (particularly injecting)
4. Criminal behaviour

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/03/2005

Eligibility**Key inclusion criteria**

Opiate dependent patients

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/09/2000

Date of final enrolment

01/03/2005

Locations**Countries of recruitment**

United Kingdom

Scotland

Study participating centre

Muirhouse Medical Group
