**Secondary identifying numbers**  
N/A

## Study information

**Scientific Title**

Optimising allied health psychological treatments in primary health care: piloting a randomised controlled trial of social worker training in focused psychological strategies

**Acronym**

SWFPS

**Study objectives**

Social workers (SW) trained for skills in focused psychological treatments will show greater improvements in psychological skills than untrained SW, as rated on the Cognitive Therapy Rating Scale (CTS).

**Ethics approval required**

Old ethics approval format

**Ethics approval(s)**

Behavioural and Social Sciences Human Ethics Sub-Committee approved on the 8th May 2009 (ref: 0830922)

**Study design**

Randomised controlled trial

**Primary study design**

Interventional

**Secondary study design**

Randomised controlled trial

**Study setting(s)**

Other

**Study type(s)**

Treatment

**Participant information sheet**

Not available in web format, please use the contact details below to request a patient information sheet

**Health condition(s) or problem(s) studied**

Mental health skills

**Interventions**

Social worker's names will be placed in an envelope and selected at random by the research co-ordinator, allocating them alternately to intervention (training group) or control group:

Intervention:

Face to face teaching sessions. Three 5-hour sessions involving role plays, and video examples facilitated by a mental health expert.

Control:

Training as usual. The control group are also offered the training (delivered in separate sessions to the intervention group) as incentive for participation.

Total duration of treatment (intervention group): three sessions of training held on consecutive Wednesdays 22/07/2009, 29/07/2009 and 05/08/2009

Total duration of follow-up: conducted on 12/08/2009, one week after the final training session

**Intervention Type**

Other

**Phase**

Not Applicable

**Primary outcome measure**

Competence on standardised consultations video-taped and rated by two blind reviewers using the Cognitive Therapy Scale, measured on 22/07/2009 and 05/08/2009.

**Secondary outcome measures**

Confidence in FPS on pre- and post-surveys, measured 09/07/2009 and 16/07/2009 for the control group, and 17/07/2009 and 07/08/2009 for the intervention group.

**Overall study start date**

01/01/2009

**Completion date**

01/12/2009

**Eligibility****Key inclusion criteria**

Registered Social Workers (adults over 18 years of age, either sex) in Victoria

**Participant type(s)**

Patient

**Age group**

Adult

**Lower age limit**

18 Years

**Sex**

Both

**Target number of participants**

28

**Total final enrolment**

40

**Key exclusion criteria**

Non-Victorian Social Workers

**Date of first enrolment**

01/01/2009

**Date of final enrolment**

01/12/2009

## **Locations**

**Countries of recruitment**

Australia

**Study participating centre**

Senior Research Fellow in Global Health

Victoria, Melbourne
