Study information

Scientific Title

Families first Edmonton: The comparative effects and expense of four models of augmenting services for low-income families

Acronym

FFE

Study objectives

Low-income families who receive primary health care (PRMHLTH) and/or Recreation Coordination (REC) will initially increase uptake of linkages to services, costs to service systems will decrease over time, and the physical and psychosocial health of family members will increase over time.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Health Research Ethics Board of University of Alberta, Edmonton, Alberta, Canada, approved on the 5th September 2006 (ref: B-030704)

Study design

Single centre prevention, behavioural, and educational intervention type, four-armed randomised factorial trial with outcome assessor blinding

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Participant information sheet

Health condition(s) or problem(s) studied

Physical and psychosocial health

Interventions

This trial will test four service delivery models:

1. The Control Model (EXIST)
2. The Primary Health Care Model (PRMHLTH)
3. The Recreation Coordination Model (REC)
4. The Comprehensive Model (COMP)

These service delivery models and the practices associated with them are designed primarily to:

1. Build and sustain low-income family-initiated linkages to established government and community services, and
2. Reduce overall costs to health and social service sectors by increasing cost-effective use of preventive and health promotional services

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

Increased linkages between low-income families and established services in their communities.

Secondary outcome measures

1. Characteristics of linkages between families and services
2. Costs to service systems
3. Adult physical health
4. Adult psychosocial health
5. Child physical health
6. Child psychosocial health

Overall study start date

01/11/2005

Completion date

01/02/2007

Eligibility

Key inclusion criteria

Participant families will:

1. Have received low-income assistance (Income Support [IS] or Alberta Child Health Benefit [ACHB]) continuously for over 12 months
2. Have a child or children between zero and 18 years of age, either sex
3. Reside in designated geographic areas that serves many low-income families, and
4. Be able to provide signed consent

Participant type(s)

Patient

Age group

Adult

Lower age limit

18 Years

Sex

Both

Target number of participants

1200

Key exclusion criteria

Potential study participants will be excluded:

1. If they refuse to give informed consent to be interviewed
2. If they are unable to read and write English and an appropriate translator is not available
3. If they have plans to move outside the regions, or
4. If they are unwilling to participate for the entire follow-up period

Date of first enrolment

01/11/2005

Date of final enrolment

01/02/2007
