Study information

Scientific Title

Study objectives

1. To provide 3 lower dentures for each research participant each one identical except for the manner in which the fitting surface has been contoured
2. To allow the research participant to assess each denture
3. To allow the research participant to choose the denture they find the most comfortable

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Oral Health: Resorbed mandibles

Interventions

Comparison of impression techniques

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

To determine which impression procedure produces the most comfortable lower denture

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/03/2009

Eligibility

Key inclusion criteria

1. Patients able to attend
2. Edentulous in the lower arch with the mental foramen apparent clinically or radiographically on the denture bearing area of the lower residual alveolar ridge

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/09/2006

Date of final enrolment

01/03/2009
