Study information

Scientific Title

Study objectives

Previous studies with pulsed dye lasers showed improvement of chronic plaques of psoriasis and, sometimes, total clearing. This study aims to investigate the efficacy of the pulsed dye laser treatment on psoriasis plaques by comparing the affected areas that have been treated with the laser against the untreated area within an individual.

Ethics approval required

Old ethics approval format

Ethics approval(s)

The study was approved by the local ethics committee (CCPPRB Paris Saint-Louis) on 21st April 2001 (ref: 2001/13)

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Psoriasis

Interventions

Two plaques were investigated in each patient, and for both plaques, 1/4 of the total area was left untreated (control area). The remaining area of both plaques were treated with the pulsed dye laser.

Randomisation: The plaques were divided in four quadrants and, by draw (throwing a four sided dice), one quadrant was chosen as the control area and the other three were treated.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Clinical score at baseline and 6 weeks after the last and third treatment by pulsed dye laser.

Secondary outcome measures

Adverse effects, followed-up for at least 2 years.

Overall study start date

02/09/2002

Completion date

02/10/2008

Eligibility

Key inclusion criteria

- 1. Both males and females, minimum age = 18, no upper age limit
- 2. Psoriasis: chronic and untreated plaques

Participant type(s)

Patient

Age group

Adult

Lower age limit

18 Years

Sex

Both

Target number of participants

28

Key exclusion criteria

- 1. Pregnant women
- 2. Minors
- 3. Patients who had received local treatment during the last month or oral treatment during the last 6 weeks (cyclosporin, retinoids, methotrexate, corticosteroids)

Date of first enrolment

02/09/2002

Date of final enrolment

02/10/2008
