Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Prevention

Health condition(s) or problem(s) studied

Signs and Symptoms: Post-operative nausea and vomiting (PONV)

Interventions

Patients undergoing elective caesarean section will be randomly assigned to either of the following two groups:

Group A: Fasted overnight from 12 midnight

Group B: A light breakfast of two slices of toasts and a cup of tea/coffee will be allowed 4 hours preoperatively
