Study information

Scientific Title

Pilot study for the comparison of drug treatment with conservative treatment for people with overactive bladders

Acronym

Pilot for the URGENT trial

Study objectives

Not provided at time of registration.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration.

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Urge urinary incontinence

Interventions

Anticholinergic drugs, bladder retraining, and their combination

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Not provided at time of registration.

Secondary outcome measures

Not provided at time of registration.

Overall study start date

01/04/2000

Completion date

30/04/2001

Eligibility

Key inclusion criteria

Adult women with urge urinary incontinence and no contraindications for anticholinergic drugs

Participant type(s)

Patient

Age group

Adult

Sex

Female

Target number of participants

Not provided at time of registration.

Total final enrolment

57

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/04/2000

Date of final enrolment

30/04/2001

Locations

Countries of recruitment

New Zealand
